

UFOMADU NNAEMEKA JOSEPH

FRONTEND ENGINEER

LinkedIn: [ufomadunnaemeka](#) | **Email:** netochukwu89@gmail.com

SUMMARY

Frontend Engineer with over six years of experience building scalable, high-performance web and mobile applications using React, React Native, Next.js, TypeScript, JavaScript, and modern frontend architecture. Experienced in delivering enterprise solutions for large organisations, including Shell Nigeria. Strong expertise in responsive UI development, API integration, state management (Redux Toolkit, React Query, Zustand), performance optimisation, authentication flows, payment gateway integration, and Agile software delivery. Proven ability to collaborate with cross-functional teams, mentor developers, and translate Figma/Adobe XD designs into production-ready applications

CORE SKILLS

React.js, Next.js, TypeScript, JavaScript (ES6+), React Native, Generative AI, HTML5, CSS, Tailwind CSS, Bootstrap, Redux Toolkit, React Query (TanStack Query), Zustand, REST APIs, Authentication & Authorization, Payment Gateway Integration, Responsive Design, Docker, Git, GitHub, Agile Development, Performance Optimization.

PROFESSIONAL EXPERIENCE

Open Desk Consulting Limited | 2021 - Present

- Lead frontend development for enterprise web applications serving thousands of users.
- Build scalable and maintainable applications using React, Next.js, TypeScript, and Tailwind CSS
- Collaborate with UI/UX designers to deliver pixel-perfect responsive interfaces.
- Integrate REST APIs and manage complex application state using Redux Toolkit and React Query.
- Implement secure authentication, onboarding workflows, payment gateways, and business-critical features.
- Improve code quality, component reusability, and maintainability across projects
- Mentor junior developers and contribute to frontend architecture decisions.

Sochi Energy (Contract) | Frontend Developer | 2020

- Redesigned and maintained the company's web app to improve user experience and responsiveness.
- Collaborated with backend engineers to integrate new features and business functionality.
- Supported marketing initiatives through digital product enhancements

BlueExpert Consulting Limited | Frontend Developer / Digital Marketer | 2018

- Designed and maintained the company website using modern web technologies.
- Assisted in developing a hospital management system and managed code delivery.
- Supported digital marketing campaigns and product promotion initiatives.
- Worked across multiple responsibilities in a fast-growing startup environment.

SELECTED PROJECTS

- Loan Management System (Shell Nigeria): Developed recruitment and staff management modules, integrated APIs, and delivered pixel-perfect UI implementations.
- Baya Resident: Built estate management features including utility payments, visitor management, polls, and Redux-powered state management.
- ManiR Logistics Platform: Redesigned logistics management platform, implemented authentication, payment processing, and manifest workflows.
- Thrift & Loan Platform: Built onboarding, loan application, and retirement processing workflows for Shell staff members.
- Vibrianet: Implemented OTP and payment alert management features using React Query and modern frontend architecture
